DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 10/30/2006 was filed after the mailing date of the NOA on 8/31/2006. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Searles et al. (US Patent 5,146,121).

With regard to claim 20, Searles et al. discloses in (Fig. 1 and Fig. 2) a device driver to receive a multiphase encoded waveform (10), having: an amplifier (50, Fig. 2 (50)) to receive differential signal levels (54, 56) representing the multiphase encoded waveform from the bus (20, 22) and extract the multiphase encoded waveform from the received differential signal levels (68); and a differential delay-lock loop (10) coupled to stretch the received multiphase encoded waveform timing to a predetermined length (col. 1, lines 30-36, 44-47, col. 2, lines 13-22, 59-68, col. 4, lines 45-68).

Allowable Subject Matter

4. Claims 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 1, 3, 5, 7-14, 16-17, 19 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a multiphase encoding system. Prior art references show similar methods but fail to teach: **“wherein a command/control signal on the command/control signal input is to indicate whether the multiphase encoded waveform is a data structure or a command/control structure”**, as in claims 1 and 13 along with the remaining limitations of the independent claims.
